Enter the number of packages by variety. Entries in the "Packages" column will transfer financial responsibility to the girl. Entries in the booth column will give girl credit for recognitions but not assign financial responsibility. It is strongly recommended to use the Smart Booth Divider to allocate booth packages. Notes are optional. Click Save. You can then create another transfer or go to manage orders. Use receipts to back up all transactions.

NOTE: Other transfer types are Girl to Troop, Girl to Girl and Troop to Troop (depending on council permissions). Basic function remains the same. For Troop to Troop transfers, only the **receiving** Troop can initiate the transfer. In this case your Troop will automatically populate as the "TO" Troop and you will be able to select the Troop that transferred the product to you. Use receipts to back up all transactions.
